I am planning on being on the call. As of yesterday, it wasn't up on public comment on their website.

Subject: Davis refinery

Hi – I'm about to send the email on Davis refinery to Monica so she knows this is going on today (unless you did already). It slipped my mind and I think she would like to know because Terry will likely be on the call and the soybean letter might come up. Are you planning to be on the call and do you have anything to say about the refinery permit review? I assume they didn't start the public comment period yet.
